

CASEMAGIC

Litigation, computed.

THE INTELLIGENCE LAYER BETWEEN COURTS AND
AI.

I built CaseMagic for my own federal lawsuit.

As a party in a federal case, I had years as a Chief Legal Officer and the best AI assistants. Neither helped with the basics: knowing when something was filed, what it meant and what was due next.

The court record lived in PACER. My AI assistant could not see it. So I connected them.

FOUNDER_NOTE

**If a Chief Legal Officer
struggles with this,
every self-represented
litigant does.**

CHRISTIAN KAMEIR / FOUNDER

A lawsuit's record is scattered, and none of it was built for AI.

SOURCE_01

Court record

PACER, court RSS feeds, RECAP archives and PDF filings.

SOURCE_02

Private record

Email, correspondence, calendars, notes and case-management tools.

GAP

AI assistants

Start every conversation from zero, with no persistent idea of the case.

AI has already changed who goes to federal court.

~2x

self-represented federal lawsuits:
about 23,000 a year (2005–2022) to
41,490 in FY2025

1 in 5

self-represented complaints in 2026
show AI-written text

59%

of all federal civil filing growth in
FY2025 came from new self-
represented cases

These litigants already use AI to file. Nothing helps their AI follow the case afterwards. CaseMagic does.

The glue between legacy court portals and AI assistants.

↳ INGEST

Courts

The official record: dockets, filings, deadlines.

↳ CONNECT

CaseMagic

One persistent CaseGraph per case: identity, history and context.

↳ ACT

AI agents

ChatGPT, Claude, Gemini, Grok and apps.

Five products on one data model, all live.

MONITOR

Case Watch

Checks a case for new filings about every 6 hours and emails alerts.

IDENTITY

Case Passport

A structured identity and history for each case.

CORRESPONDENCE

CaseMail

A private email address per case that files mail with the case.

DISCOVER

Filing Streams

New federal lawsuits as they are filed, by court and topic.

AGENT / API • MCP

Agent and API layer

17 tools that let AI assistants look up, watch and explain cases over the Model Context Protocol (MCP).

Every major AI assistant is a channel.

AGENT	STATE
CHATGPT	Live · app submitted to OpenAI 2026-09-22
GEMINI	Live · function calling
CLAUDE	Verified over MCP
GROK	Verified over MCP
META MUSE	Submitted to directory · not yet tested

Listed in the public MCP registry, so any agent that speaks MCP can find CaseMagic.

Already covering the U.S. federal courts.

Every number here is a count from the production database on October 5, 2026.

94

FEDERAL DISTRICT COURTS

88

COURT FEEDS READ CONTINUOUSLY

16,410

NEW CASES / 30 DAYS

125,012

PUBLIC CASE RECORDS

17

AGENT TOOLS · MCP

Millions of new cases a year, and all of them need tracking.

WEDGE

303,563

new federal civil cases in FY2025, a third with a self-represented party

USERS

5.3M

PACER accounts in FY2025, the people already paying to read federal records

EXPANSION

~13.6M

new state civil cases a year; 76% have a self-represented party

SPEND

\$374B

U.S. legal services revenue in 2023

We start with federal cases, where data is uniform and nationwide, then add state courts on the same data model.

The AI tool standard is set. Court data has no default yet.

STANDARD

Since December 2025, MCP is run by the Linux Foundation, backed by OpenAI, Google, Microsoft and AWS. 10,000+ tools already use it.

AUDIENCE

ChatGPT alone passed 900 million weekly users in February 2026.

CASEMAGIC

Works in ChatGPT, Claude, Gemini and Grok today. Incumbent docket services were built for law-firm logins, not AI agents.

Assistants reuse the tools that answer well. Being early and reliable is how a tool becomes the one they call.

Investors and buyers are paying for legal data and AI.

\$1B

CLIO ACQUIRES VLEX · 2025

Legal data company that owns Docket Alarm. The largest legal tech deal to date.

\$15.5B

HARVEY · SEPT 2026

Legal AI for law firms, reported at \$300M annual recurring revenue in May 2026.

Open

EVERYONE ELSE

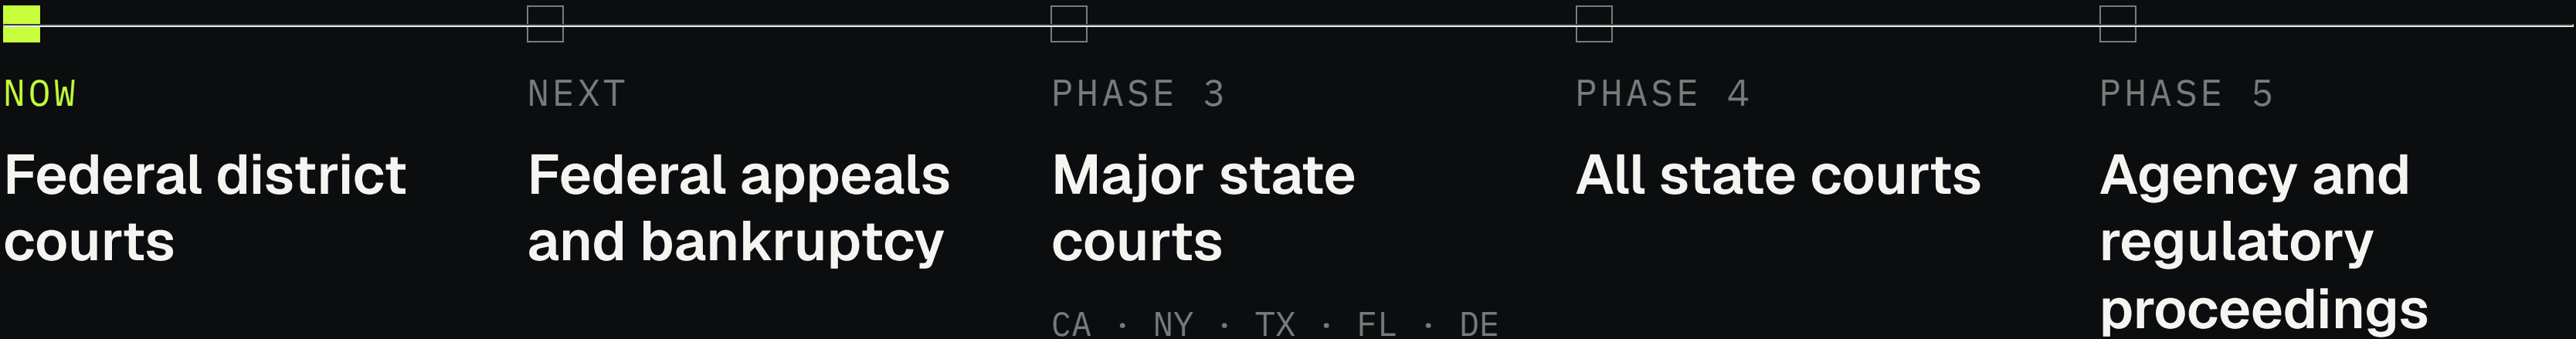

Those serve law firms. Nobody owns court data for the people and AI agents outside them.

Recurring revenue that lasts as long as the case.

INDIVIDUAL	PROFESSIONAL	PRACTICE	ENTERPRISE / API
\$99	\$299	\$599	Usage
/ MONTH	/ MONTH	/ MONTH	CONTRACT · PLANNED

Self-serve plans are live through Stripe with a 7-day free trial.

One data model, more courts.

Raising \$3M seed, led by data.

AREA	SHARE	AMOUNT	WHAT IT BUYS
Court data and feeds	30%	\$900K	Licensed and bulk court data; state coverage
Product and engineering	25%	\$750K	First engineering and data hires
Growth and AI distribution	20%	\$600K	Assistant stores, search, partnerships
Model tuning and compute	10%	\$300K	Tuning open models on our case data
Security and compliance	7.5%	\$225K	Enterprise readiness
Legal, admin and reserve	7.5%	\$225K	Operations and contingency

A legal executive and software investor, building at AI speed.

Christian Kameir

FOUNDER

- Chief Legal Officer, NIKOMA (German internet service provider)
- Software investor
- Harvard guest lecturer
- Forbes contributor, technology and finance

CaseMagic was built with AI development tools: 327 production changes in its first 17 days, with a team of one.

The seed round adds the first engineering and data hires.
